THE BIRMINGHAM POST,

like its bewhiskered men, was as much the result of necessity as of fashion. Today science has developed a radically new lamp for study and reading. America s foremost eyesight specialists and lighting engineers wrote the specifications, it provides the wealth of glareless light that eyes need when studying or doing other visual tasks for prolonged periods. It gives 6 to 10 times as much light as ordinary lamps. No eye-straining glare. Uses 100-watt MAZDA lamp. Every study table should have one of these new lamps. No other lamp ca give you all of its benefits.

Specifications by: The Illuminating Engineering Society—country-wiorganization of lighting experts. Certified by The Electrical Testing Laboratories—keen, impartial engineering organization of New York City Endorsed by The Lighting Committee of the Edison Electric Institute; also by the National Better Light Better Sight Bureau.
